## Description

---

Cell and tissue culture plates with treated surface are perfect for adherent cell growth in multiple, comparative and other analysis. Uniform well volume ensures equal growth surface. The well surface is smooth and free of streaking to maximize usable growth area. To reduce evaporation, raised edges are provided on each well with matching uniform rings on the inside of the lid. The single position (cut corner) lid reduces the risk of cross-contamination and handling hazards. Wells are marked with alphanumeric code for easy identification. The plates are suitable for all common instruments and automats.

Sterilized by gamma radiation

DNase / Rnase free

Non-pyrogenic

## Additional Information

---

No.	C-8210
Manufacturer (Brand)	neoCulture
EAN	4058072154769
Transport temperature	Room temperature
autoclavable at 121°C	Yes
Color	transparent (crystal clear)
Material	Polystyrene (PS)
Volume	17 ml
sterile	Yes
Multi-hard disk features	surface optimized individually packed alphanumerically coded
Number of cavities	6
Fluid behavior	hydrophobic
suitable for cooling in	Refrigerator freezer/ freezer
Shape floor	F shape (flat)
Shape cavities	around
Type plate	Cell culture plates
Type frame MTP	full frame
