

Bandelin KE 76, CONE TIP

Product Images

Description

The KE 76 cone tip is a tapered horn made of high-strength titanium alloy TiAl6V4 (3.7165). The KE 76 cone tip is used for sonication of small to medium volumes. Due to its geometry, it achieves multiple amplitude amplification and thus reaches highest ultrasonic power densities in liquids. It is used for complicated laboratory tasks, such as cell and bacteria disruption in biology and reaction acceleration in chemistry.

No.	BL-0316
Reg. trademark	SONOPULS ®
Dual use indicator	false
Manufacturer (Brand)	Bandelin
VGKL number	530703068
EAN	4058072506919
diameter	6 mm
Country of origin	Deutschland
Region of origin	Berlin
Packing width	0.17000 m
Packing height	0.03000 m
Packing depth	0.09000 m
Packaging volume	0.01007500 ccm
Customs tariff number	84799070

Additional Information
